MoliCare[®]

Protection. Every day.

HARTMANN has been providing healthcare products for over 200 years and incontinence products for over 50 years. We take a holistic approach to healthcare, placing emphasis on the tangible benefits for patients and those who care for them, aiming to enhance their well-being.

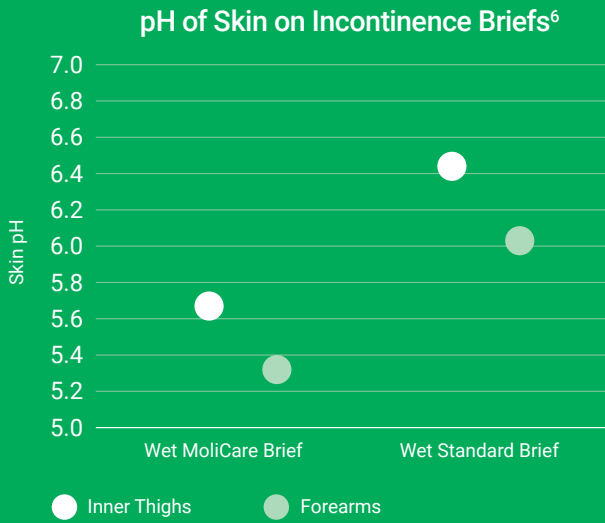

The MoliCare Difference

MoliCare is dedicated to meeting the most stringent standards of quality, dependability, and effectiveness by utilising our advanced technology to develop innovative solutions for managing incontinence. The aim is to address the needs of individuals living with incontinence, enhance the daily duties of skilled caregivers, and satisfy the expectations of healthcare professionals.

Incontinence can disrupt the skin's natural barrier and acid protection mantle, leaving it more susceptible to irritation and damage from urine and faeces.¹ In order to prevent Incontinence Associated Dermatitis (IAD), which can cause skin inflammation, blisters, itchiness or skin erosion²⁻⁴, it is important to take measures to protect the skin from the harmful effects of incontinence.

MoliCare provides absorbent products that are specifically designed to keep the skin dry and maintain its acid protection layer. This can help alleviate the negative consequences of stress factors associated with incontinence and prevent the development of IAD. This is in line with expert recommendations, which emphasises the importance of preventing IAD as a means of improving quality of life for individuals living with incontinence.⁵

MoliCare Absorbent Products:

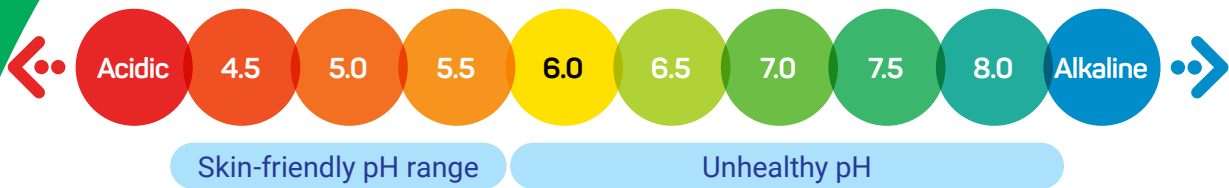

- ✔ Significantly lower skin pH values compared to standard briefs, when skin is exposed to alkaline solution.^{6,7}
- ✔ Lower the prevalence of erythema^{6,7} which is skin redness, an early sign of skin irritation.

Graph data from Bliss Study Absorbent Briefs Containing Curly Fiber Lower (Acidify) Skin pH Reducing Risk for Incontinence Associated Skin Damage in Older Nursing Home Residents.⁶ ANOVA F=8.83 for thigh and F=10.12 for forearm pH differences, p < .001 for both; in post-hoc comparisons, skin pH values after wet brief using MoliCare are lower than all other conditions (p=.001 for all).⁶

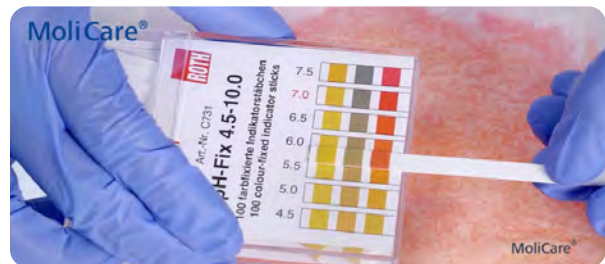

✔ MoliCare controls odour and promotes a healthy skin environment.

- Buffers urine to a skin-friendly pH
- Maintains a skin-healthy pH balance
- Preserves the acid protection mantle
- Facilitates rapid fluid distribution within the brief
- Keeps the skin feeling dry

View MoliCare's optimal skin compatibility video to understand how it works.

Health Economics of MoliCare

Incidence

In an acute care study of 5,432 patients¹:

- 45.7% of patients had a prevalence of IAD
- 73% of IAD patients developed IAD following admission

IAD accompanied by unrelieved pressure results in a 5-fold increase in pressure injury risk²

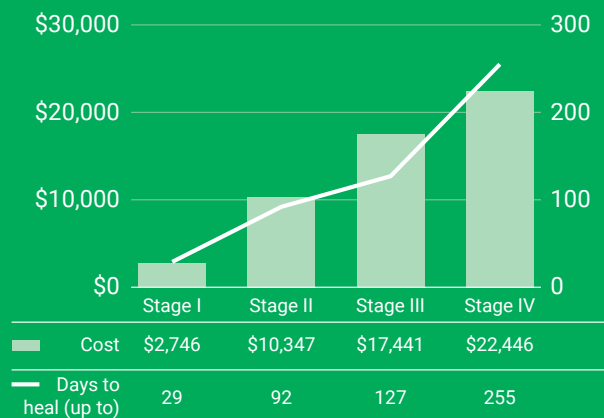

Cost - IAD¹

The average cost to treat one mild to moderate IAD episode in one resident is \$220.

IAD occurrence can be up to 52%, resulting in costs of \$3,294 per month.

(This example assumes 20% in a 100 bed long term care facility with 75% incontinence at April 2018 rate¹)

Cost - Pressure Injuries^{2,3}

1. Gray M., Giuliano, K.K., JWOCN, Incontinence Associated Dermatitis, Characteristics and Relationship to Pressure Injury A Multisite Epidemiologic Analysis, January/February 2018. 2. Melder, Pressure Ulcer Assessment and Treatment; Wild Iris Medical Education 2014; 17. 3. Bliss et al., An economic evaluation of four skin damage prevention regimens in nursing home residents with incontinence; economics of skin damage prevention; J Wound Ostomy Continence Nurse. 2007;34(2): 143-152.

The MoliCare Skintegrity System

MoliCare offers a comprehensive approach to incontinence management by combining MoliCare absorbent products with MoliCare Skin care products. This combination, known as the MoliCare Skintegrity System, helps to maintain a healthy skin pH balance and help prevent the occurrence of Incontinence Associated Dermatitis (IAD).

MoliCare absorbent products work in conjunction with MoliCare Skin care products to maintain the acid protection mantle and provide a skin-neutral pH balance.¹

Our goal is to provide innovative solutions that improve the management of incontinence, allowing individuals to live with greater comfort and dignity.

THE NUMBERS DON'T LIE

Whether its the over **40,000** using the **Molicare range**, or the cost savings we achieve for our clients, the numbers really don't lie.

With a focus on quality of life and quality of care, our integrated model of care will deliver the desired outcomes for patients, caregivers and your finance team.

Thanks to all our fantastic MoliCare customers, we value your support and custom.

If you're not using the USL Continenence solution, speak to one of our dedicated team members today.

Come and learn why so many people choose Molicare.

Features and benefits - UCOMS

Integrated with the USL Website using existing logins and cart functionality.

Comprehensive reporting options allow for control of your allocations and spend, view any residents on 3 or more pads per day and easily report on private paying costs.

NZ owned and more reliable. We can easily make changes and add functionality to UCOMS as we gather your feed-back.

Email ucoms@uslmedical.co.nz for more information or to request a demonstration.

View product information, pricing, orders in progress and track shipped orders.

An order approval process can be enabled to give management the opportunity to review and release orders.

Introducing our very own UCOMS – USL’s Contenance Online Management System

1. RESIDENTS

– store resident information including: Level of Care, Wing, Room, Status and Product Allocations

2. RESIDENTS ALLOCATIONS

– an **easy to read**, visual web page showing all resident and their daily allocations. Costs are clearly shown and there is easy click through access to the Resident Card to make changes

3. ORDERING

– **fast and simple** ordering process integrated with our existing website cart. Mandatory requirement to complete a stock take for each order results in more accurate stock levels

4. REPORTING

– a suite of reporting options including Planned and Actual Costs, Picking List, Residents on 3 or more Pads and Private Paying Report

Ask us how UCOMS can make your residents' pad allocations simple

Personalised to fit your needs

DO YOU HAVE RESIDENTS WHO HAVE

- Diabetes ?
- Asthma ?
- Auto Immune disorders ?
- Difficulty swallowing or eating?
- Palliative care?
- A dry mouth

Oral7 improves oral hygiene and helps restore the mouth's natural moisture.

YOUR THREE STEP APPROACH TO A FRESH HEALTHY MOUTH.

1

CLEANSE MOISTURISING TOOTHPASTE

- Cleans away the bacteria associated with bad breath, sore gums, cavities and plaque
- Low foaming, no sodium Lauryl Sulphate (drying agent)
- With fluoride and calcium
- Can be used in place of your regular toothpaste

CODE O7101S ORAL 7 Moisturising Toothpaste

2

BALANCE MOISTURISING MOUTHWASH

- No alcohol + no methanol = no burning or stinging
- Keeps breathe fresh
- Promotes healthy gums
- Cleans away the bacterial associated with bad breath, sore gums, cavities and plaque
- Re balances the Oral Bio-system with natural enzymes when used in-between brushing

CODE O7103S ORAL 7 Moisturising Mouthwash

3

MOISTURE MOISTURISING MOUTH GEL

- Extra beneficial for Dry Mouth sufferers
- 7 hours relief enables uninterrupted sleep
- Helps swallowing
- Soothes and protects gums
- Suitable for denture wearers and mouth breathers

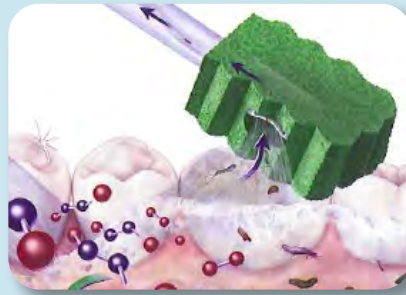

CODE O7102S ORAL 7 Moisturising Mouth Gel

ORAL CARE

CLEAN

Brushing and suctioning mechanically removes bacterial biofilms (dental plaque) from teeth and oral tissues.

DEBRIDE

Swabbing and suctioning with Perox-A-Mint® solution helps remove dead, loosened biofilms.

MOISTURISE

Mouth Moisturiser soothes and moisturises oral tissues.

OPEN WIDE MOUTH PROP

- Disposable mouth prop, soft foam rigid core
- User friendly, gentle in the residents mouth
- Can be re-used for same resident

90008 / Open Wide Mouth Prop

SURROUND® TOOTHBRUSH

Helps those with limited dexterity such as arthritis or brain injury to easily and effectively brush their teeth

Easy care for those with Dementia

FEATURES:

- Compact head with soft, end-rounded bristles clean both teeth and gums
- Head and neck of brush designed to make brushing safer even with those who tend to bite down on the toothbrush

Bends for improved access

27120 / Surround Toothbrush

TOOTHETTES

Toothette® Oral Care delivers a comprehensive approach to oral hygiene based on cleaning, debriding, suctioning and moisturising the entire oral cavity.

- Can be used with Oral7 range

Untreated

10124 / Sage Oral Untreated Toothette / BG200

Treated

Treated Toothettes® contain Sodium Bicarbonate.

10125 / Sage Oral Treated Soda-BicToothette / BG200

PEROX-A MINT® SOLUTION

Keeping the mouth clean is an important part of overall health. Bacteria in the mouth can form dental plaque, which has been linked to various diseases that originate in the mouth, including gingivitis.

“Perox-A-Mint Solution helps break down plaque build up to keep the mouth healthy and clean.

90011 / Sage Perox-a-mint 1.5oz Bottle / each

WELCH ALLYN THERMOSCAN BRAUN PRO 6000

Advanced measurement technology that captures accurate, reliable temperature readings in a comfortable way for patients

When the PRO 6000 probe tip is placed in the ear, it continuously monitors the infrared energy emitted by the tympanic membrane and surrounding tissues, until a temperature equilibrium has been reached and an accurate measurement can be taken.

Large, backlit LCD display is intuitive and easy to read

Dedicated memory recall button to display last measurement taken

60-second timer for manual pulse and respiration measurement

Pre-heated probe tip and sensor helps support accurate measurements

Green illuminating LED signals ExacTemp positioning feedback on probe tip

Ergonomic handle design for a comfortable and secure hold

Innovative PerfectTemp® technology adjusts for variability in probe placement. ExacTemp® technology detects stability of the probe during measurement.

- A pre-warmed sensor helps support accurate measurements
- Memory recall button displays last measurement taken
- 60-second pulse timer can assist you with manual measurement of pulse rate and respirations .
- Our design uses plastics compatible with common medical-grade cleaning products .

CODE 406000200

CONTACT US FOR MORE INFORMATION AS THERE ARE MULTIPLE CONFIGURATIONS AVAILABLE

CSM

Designed for simplicity and ease-of-use, delivering accurate, automated vitals in one user-friendly solution capturing a full set of patient vitals in less than a minute.

- Blood Pressure SureBP® technology measures blood pressure on inflation in as little as 15 seconds. Plus, automated blood pressure averaging has been shown to help reduce hypertension misdiagnoses.¹
- Thermometry SureTemp® Plus and Braun thermometry options are known for accurate readings across patient populations.
- Pulse Oximetry Devices support a variety of leading SpO2 technologies: Masimo®, Nellcor® or Nonin®.

PROBP 2000

Our SureBP inflation-based algorithm is used across Welch Allyn vital signs devices, helping clinicians in every care setting capture automated, fast and accurate blood pressure readings.

- Blood pressure readings are captured more comfortably on inflation and take about 20 seconds
- Meets AAMI standards for blood pressure accuracy
- One-button touch triggers the device to start capturing on cuff inflation
- 97% completion rate in the presence of motion

- 40PRO2000 / ProBP 2000, runs on AA batteries
- 40107041 / Mains Power Cable
- 40107194 / Wall Mount
- 40107195 / Stand

ProBP 3400 with SureBP

Automatic BP unit with fast BP technology.
Does not get tight on the arm

- SureBP™ NIBP technology enables fast, accurate 15-second readings
- Compatible with Welch Allyn cuff sizes from small child to thigh
- Lithium ion battery technology delivers up to 100 readings on a single charge
- Configurable to match your workflow and specific resident needs
- Meets AAMI Standards, awarded BHS A/A rating.
- Obtains accurate readings, even in the presence of some motion or weak pulse

- 4034XFHT-6 / ProBP 3400 with SureBP
- 40460061 / ProBP Mobile Stand + Kit
- 40460161 / ProBP Wall mount - only
- 40460261 / ProBP Desk mount

WELCH ALLYN® SPOT VITAL SIGNS® 4400 device

**NOW

MANAGING MOBILITY

Speak to USL today about our range of patient lifting and mobilisation devices.

Catering for a range of mobility challenges, USL has the answer to provide essential support and stability during resident transfers.

From a seated to a standing position, to full hoist transfers, we have solutions to support independence, dignity and caregiver support, fostering a positive experience for everyone involved.

7500i ROMEDIC RETURN

Safe and active sit-to-stand and transfer - without any heavy lifting

ReTurn 7400, 7500 & 7600 are easy-to-use and incredibly effective assistive devices providing convenient and natural support for sit-to-stand and transfer, but they are also a rehabilitation device.

- **SWL:** 7500i & 7500 150kg
- **SWL:** 7600 205kg

ROMEDIC QUICKMOVE

The QuickMove has been developed for users with impaired balance and strength in their legs but the user must have some strength in the arms and must be able to weightbear to actively participate in the transfer.

- **SWL:** 170kg

ROMEDIC MINILIFT

The RoMedic MiniLift is a mobile sit-to-stand lift which has been developed to gently assist the user when rising from a sitting to a standing position. When MiniLift is combined with the appropriate lifting accessories, the user gets support for the front of the lower legs and behind the back, which provides for a safe yet active sit-to-stand procedure.

- SWL: 160kg & 200 kg

ROMEDIC MOBILE HOIST

The RoMedic hoist is a versatile mobile patient lift for all lifting situations and for users weighing up to 270kg.

- SWL: EVA450EE 205 kg
- SWL: EVA600EE 270 kg

USL has an extensive range of accessories to aid with patient mobility.

If you're looking for effective ways to reposition residents in chairs, slide sheets to reposition a resident in bed or a full range of slings to aid patient transfer, USL has an answer.

If you want to try some of these items to see if they can assist your facility, speak to one of our team today.

ROMEDIC RETURN BELT

RoMedics ReTurn Belt is an excellent complement to the ReTurn when there is a need for support and stability. ReTurn Belt can also be used separately, for support during sit-to-stand and to stabilise the user in an upright position during standing training, gait training and transfer.

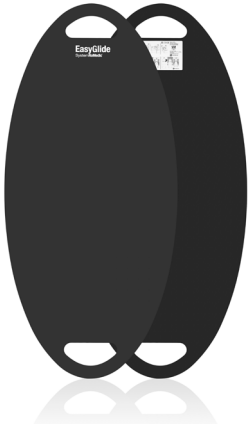

ROMEDIC CHARGER HOIST SCALES

The RoMedic Charder MHS2500 scale set can be used together with stationary or mobile lifts for weighing of users. Charder MHS2500 is available in two models; one for users weighing up to 400kg.

ROMEDIC THORAX STAND UP SLING

ThoraxSlings are specially adapted sit-to-stand vests that are available with seat supports and used in combination with SystemRoMedic™ sit-to-stand lifts MiniLift200, MiniLift160 and MiniLift125.

EASYGLIDE OVAL

Ideal for supine transfers and for placing a hoist sling

EasyGlide, oval is a sliding board which is used for supine transfers from one bed or stretcher to another but also for positioning higher up in the bed. EasyGlide, oval can also be used to assist placement of a lifting sling both in the recumbent and in seated positions. Please watch the movie hereunder for a few examples.

EASYGLIDE EXTRA LONG

ROMEDIC ONEWAY SLIDE WITH HANDLES

It effectively slows forward movement yet slides backwards, making it easy for the user to help the patient move into a more comfortable position. It is easy just take the handles and pull - without a great use of force.

ROMEDIC AUTOSLIDE

Getting into a car can be awkward and hard, but if done easily then this is the key to freedom for many people. The Autoslide is a device that makes it easier to get into cars in a comfortable position. Size 48cm x 48cm.

ROMEDIC ONEWAY SLIDE

Ideal for positioning in a chair or a wheelchair

OneWaySlide is a sliding mat with many functions. The main one improves sitting positions in chairs or wheelchairs.

ACCESSORIES TO SUPPORT MOBILITY

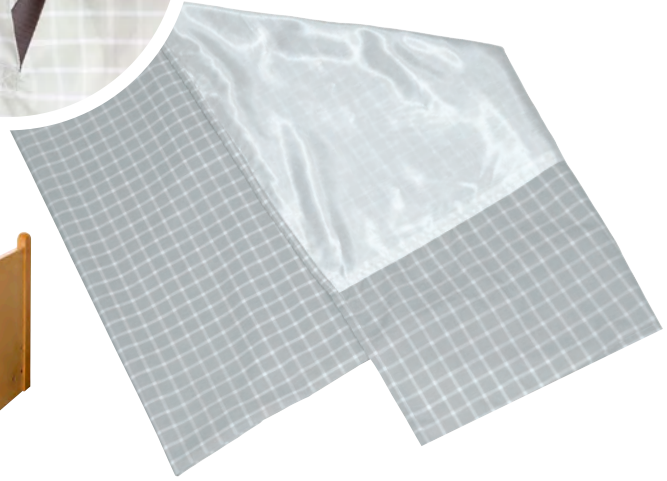

WENDYLETT RANGE

Comfortable Functional Material. A transfer aid which helps prevent pressure injuries

The WendyLett family

WendyLett is a satin sliding sheet and a base sheet to be combined with

- WendyLett2Way, a drawsheet for sliding sideways or
- WendyLett4Way, a sliding drawsheet for multi-directional sliding.
- WendyLean pillow cover
- Mattress positioning cover

TRAINING
AVAILABLE

USL SLIDESHEETS

- Slide sheets help reduce shear and friction when moving residents in beds, turning residents on their sides or transferring residents from a bed
- For residents who has fallen into a confined space; slide sheets can be used to move the residents along the floor to a location where a hoist can be used

ACCESSORIES TO SUPPORT MOBILITY

SPENT IN BED

MERCURY ADVANCE - "WINNER OF THE 2016 QUEENS AWARD FOR INNOVATION"

The Dyna-Form™ Mercury Advance is a dynamic mattress replacement system combined with the benefits of modern foam technology. It is specifically designed for residents considered to be at "High Risk" and "Very High Risk" of pressure injury development.

A higher maximum weight capacity 54kg, allows the product to meet the modern challenges of those heavier clients.

The outer cover comprises a high frequency welded, multi stretch and vapour permeable fabric, satisfying the strictest infection control policies required. Similarly, the mattress' function can be downgraded as the resident's condition improves.

"Hybrid Step Up, Step Down"

VERY HIGH RISK

AVAILABLE SIZES: SINGLE / KING SINGLE
DOUBLE / QUEEN BARIATRIC KING / SINGLE

PRESSURE INJURY PREVENTION AND MANAGEMENT

DYNA-FORM™ MATTRESSES

HIGH RISK

STATIC AIR HZ

Dyna-Form™ Static Air HZ, a new generation of static support surface, developed in conjunction with the Welsh Wound Innovation Center.

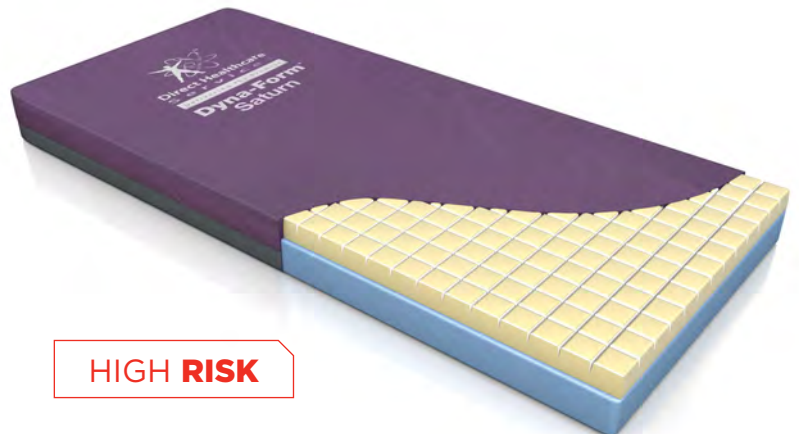

Dyna-Form™ Static Air HZ is a mattress replacement system that combines the benefits of effective air displacement technology with the best of modern foams, for a new standard of innovative pressure injury prevention management.

It's new and unique 'air only' intelligent heel zone and specially designed U-Core effectively offloads pressure on the particularly vulnerable heel area.

SATURN

The Dyna-Form™ Saturn mattress is designed for users considered to be that of 'High Risk' of pressure injury development and for residents requiring complete comfort, whilst maintaining the highest pressure care support from a static mattress.

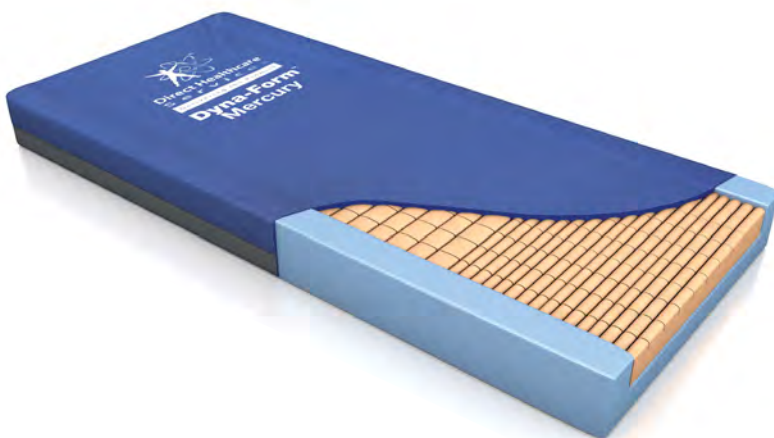

By using a blend of temperature sensitive, visco elastic foam at resident interface with the finest quality CME foam, the Dyna-Form™ Saturn provides excellent pressure re-distribution properties, but with resident comfort foremost considered within its design.

HIGH RISK

STATIC MERCURY

The Dyna-Form™ Mercury mattress is specifically designed for users considered to be at "High Risk" of pressure injury development. Comprising of a specialist "castellated cut" and blends of the finest quality Combustion Modified High Resilient foam (CMHR) this product provides not only the best pressure re-distribution properties, but great resident comfort & product longevity. Side Wall construction enables primary stability for resident transfer purposes. Complete with a durable, multi-stretch, vapour permeable cover and a toughened polyurethane base, the Mercury mattress provides an important contribution towards the infection control and tissue viability standards of a modern hospital, nursing or homecare environment.

HIGH RISK

CAREWELL BED

- Atractor cross lift functionality
- Head tilt functionality
- Electric three function bed
- Electric knee break
- Central Locking 125 mm castors
- Epoxy powder coating
- In built leg extension
- Wood grain head and foot board
- Height range: 210 to 760mm
- Removable metal infection pads
- SWL 215kg

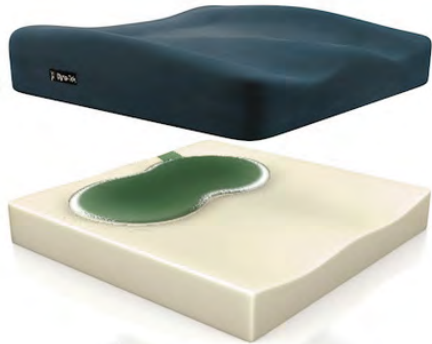

FROM **BED** TO CHAIR

If the numbers above were an eye opener, then look how much time some people spend seated.

It can match time spent in bed, hence why USL have the perfect solution for those high risk residents.

We have a range of cushions that will reduce the risk of pressure injury, just simply add one of our cushions to your resident's favourite chair.

PRESSURE RELIEVING CUSHIONS

DYNA-TEK™ GEL CUSHION

Designed using the latest polyurethane gel. By incorporating the most advanced raw materials during the manufacturing process, enhanced postural management and greater pressure re-distribution is achieved.

VERY HIGH RISK

DYNA-TEK™ INTELLIGENT AIR

Sets a brand new standard in innovative wheelchair seating, delivering superior 'bespoke' pressure redistribution without the need for any set-up or re-pumping air lost over time.

VERY HIGH RISK

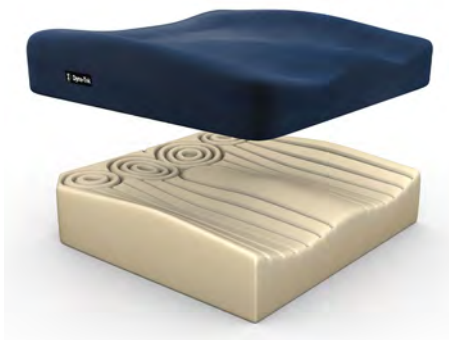

MERCURY ADVANCE CUSHION

Is a dynamic replacement seating system, combined with the benefits of modern foam technology. It is specifically designed for residents considered to be at 'Very High Risk' of pressure injury development.
