PHILIPS

**Channel
Partner**

We're proud to announce that USL Medical is the new trusted supplier for Philips AEDs.

Have an AED on hand.

Philips HeartStart HS1 and FRX AEDs

With the Philips HS1 for indoor use and the waterproof FRX for on-the-go, we've got your hospital, facility, clinic covered.

Over 2000 New Zealanders suffer an out of hospital cardiac arrest every year. Every minute CPR and defibrillation is delayed, survival decreases 10-15%.

Importance of healthy skin

The skin is the largest organ in the human body and plays a vital role in protecting it from external factors. The skin's surface is covered by a delicate acidic film known as the acid protection mantle, that shields against harmful environmental factors and bacteria. Maintaining a slightly acidic pH of 4.5 to 5.5 is essential for skin integrity.

Multiple risk factors, can weaken the skin and make it more susceptible to damage. This can lead to a range of skin conditions, including skin tears, Incontinence Associated Dermatitis (IAD), and pressure injuries (PI). It is essential to maintain skin integrity to prevent these conditions.

Common risk factors for skin injury

Graph 1: Skin Injury Prevalence

! PEOPLE WITH IAD HAVE A 37.5% GREATER RISK OF DEVELOPING A PRESSURE INJURY.⁷

Prevention: What the experts recommend

Skin Tears	IAD	Pressure Injury	Intertriginous Dermatitis (Intertrigo)
<ul style="list-style-type: none"> • Use soapless, no-rinse and/or pH-neutral skin cleansers.⁸ • Moisturise the skin twice daily to reduce incidence up to 50%.⁹ 	<ul style="list-style-type: none"> • Use a cleanser with a low surfactant.¹⁰ • Soap and water should be avoided to maintain the skin's normal pH.¹¹ • Use cleansers, wipes or emollients that will cleanse and moisturise at the same time, reducing skin irritation and dehydration.¹¹ • Minimise tissue breakdown from external factors with skin barrier products.¹¹ 	<ul style="list-style-type: none"> • Use a pH balanced cleanser to promote healthy skin.¹⁴ • Use a moisturiser to maintain moisture balance and reduce the risk of skin damage.¹⁴ • Protect the skin from moisture sources (e.g. incontinence) to reduce the risk of skin damage.¹⁴ 	<ul style="list-style-type: none"> • Cleanse with a no-rinse, pH-balanced cleanser and avoid the use of alkaline soaps.¹² • Keep the skin clean and dry and inspect regularly.¹³ • Before applying skin care, rule out infection. Skin care may include skin barriers to protect the skin from moisture and irritation.¹³

Prevention is key with MoliCare®

Skin tears, IAD and pressure injuries present significant challenges for people, including causing pain, discomfort, and reduced mobility. Prevention and management strategies are crucial for improving patient outcomes and reducing healthcare costs.

Clinical evidence suggests a structured skin care regimen with products to cleanse, protect and care for skin, can significantly decrease the incidence of skin tears⁹ and prevent the onset of IAD and PIs.¹⁵

A preventative skin care strategy includes selecting the right cleanse, protect and care products to suit the assessed needs of the skin. Skin at lower risk of irritation requires products that can support and maintain the acid protection mantle. Skin at a higher risk of irritation requires skin care formulations designed to penetrate the deeper layers of the skin for maximum nourishment and protection.

Better care

Up to 64% of people who suffered from IAD or severe skin issues had no skin irritations after 18 days of using No Rinse products.¹⁶

Efficient

By using No Rinse products, professionals can reduce time spent on each cleansing by up to 4 min.¹⁶

Economic

Cleansing with No Rinse products helps to save costs such as hygiene and laundry products.¹⁶

CONTINENCE CO-ORDINATOR RESPONSIBILITIES

To ensure the USL continence system works effectively, the resource person would oversee the following:

- 1 USL Medical will work with this person to ensure they have a good knowledge of the systems and continence range available.
- 2 Monitor and review the residents' incontinence product usage
- 3 Ensure residents have the product to meet their level of incontinence (organise reassessments as necessary)
- 4 Update resident allocation charts as necessary
- 5 Daily allocation of the correct products to resident
- 6 Ensure Additional Product Usage Form is available and used by all staff
- 7 Monitor and review the Additional Product Usage Forms regularly. Residents using products over the allocation may require further assessment
- 8 Ensure pads for additional use are available
- 9 Ensure all other products are securely locked away
- 10 Hands-on guidance with staff to ensure correct product application and use
- 11 Liaise with USL Account Manager for training sessions as required
- 12 Ordering of incontinence products

MoliCare Assortment Overview

3 easy steps to select the right pad

- STYLE**: Various styles suit different levels of mobility.
 - Active: Most pads suitable. Selection based on personal preference.
 - Active with restricted mobility and/or cognitive difficulties (e.g. dementia): Pull-up, wrap-around, Lock and Release, Reusable products.
 - Restricted/impaired mobility or bedbound: All in-bed products recommended. Elastic tops for trousers.
- ABSORBENCY**: Giving the right level of protection – Choose an absorbency that suits your level of incontinence and keeps you dry.
 - Less Absorbent: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.
 - More Absorbent: 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200.
- SIZE**: To ensure maximum comfort and leakage protection:
 - Measure the largest width between the waist and hips.
 - Select the size based on the size guide printed on the packaging.

MoliCare Premium Elastic Fitting Guide - Standing Position

How to select the correct size to ensure minimum comfort and leakage protection:

- Measure the leg length between the waist and hips.
- Select the product size based on the size guide printed on the product packaging.

Key benefits & principles

- Ergonomics in the workplace**: Faster application, reduced bending & physical stress.
- Comfort & Security**: Elastic-Resiliency allows product to wear over clothes with maximum comfort and security.
- Improved Hygiene**: Shrinkable film pad form the back ensures lower risk of bacterial contamination.
- Dignity**: Check every application and the ability for reposition tapes reduce changing times.

Product wall charts and fitting guides

THE NUMBERS DON'T LIE

Whether it's the tens of thousands of customers using the **MoliCare®** range, or the cost savings we achieve for our clients, the numbers really don't lie. There is a reason **MoliCare®** is the market leading incontinence brand in New Zealand. With a focus on quality of life and quality of care, our integrated Model of Care will deliver the desired outcomes for patients, caregivers and your finance team.

Thank you to all our fantastic **MoliCare®** customers, we value your support and the incredible relationships we've built over the years.

If you're not using the USL Continence Solution, speak to one of our dedicated team members today. Come and learn why so many people choose **MoliCare®**.

Come and learn why so many people choose Molicare®.

Features and benefits - UCOMS

Integrated with the USL Website using existing logins and cart functionality.

Comprehensive reporting options allow for control of your allocations and spend, view any residents on 3 or more pads per day and easily report on private paying costs.

NZ owned and more reliable. We can easily make changes and add functionality to UCOMS as we gather your feed-back.

Email ucoms@uslmedical.co.nz for more information or to request a demonstration.

View product information, pricing, orders in progress and track shipped orders.

An order approval process can be enabled to give management the opportunity to review and release orders.

Introducing our very own UCOMS – USL’s Continence Online Management System

1. RESIDENTS

– store resident information including: Level of Care, Wing, Room, Status and Product Allocations

2. RESIDENTS ALLOCATIONS

– an **easy to read**, visual web page showing all resident and their daily allocations. Costs are clearly shown and there is easy click through access to the Resident Card to make changes

3. ORDERING

– **fast and simple** ordering process integrated with our existing website cart. Mandatory requirement to complete a stock take for each order results in more accurate stock levels

4. REPORTING

– a suite of reporting options including Planned and Actual Costs, Picking List, Residents on 3 or more Pads and Private Paying Report

Ask us how UCOMS can make your residents' pad allocations simple

Personalised to fit your needs

MEDIHONEY® Wound and Burn Dressing

SUPPORTING MOIST WOUND HEALING

Dramatic changes have been seen in the field of advanced wound care within the last two decades. The practice of moist wound healing has significantly improved outcomes and has helped clinicians make knowledge-based decisions affecting the healing process.

Medihoney® dressings, containing Active *Leptospermum* (Manuka) Honey (ALH), address many factors that delay healing. They help to promote a moist wound environment that aids and supports autolytic debridement.

Wound Gel

Medical Honey

PRESSURE INJURY PREVENTION & MANAGEMENT

View USL's extensive range of mattresses for managing low to very high risk residents.

With mattress solutions that have the latest technology for pressure injury prevention and management, USL caters for residents who are low risk to very high risk.

Mattress choice is important!

If you have any of these stages, you are in need of a high to very high risk mattress

What is a pressure injury?

A localised injury to the skin and/or underlying tissue usually over a bony prominence, as a result of pressure, or pressure in combination with shear and/or friction.

MANAGING MOBILITY

Speak to USL today about our range of patient lifting and mobilisation devices.

Catering for a range of mobility challenges, USL has the answer to provide essential support and stability during resident transfers.

From a seated to a standing position, to full hoist transfers, we have solutions to support independence, dignity and caregiver support, fostering a positive experience for everyone involved.

ROMEDIC MINILIFT

The RoMedic MiniLift is a mobile sit-to-stand lift which has been developed to gently assist the user when rising from a sitting to a standing position. When MiniLift is combined with the appropriate lifting accessories, the user gets support for the front of the lower legs and behind the back, which provides for a safe yet active sit-to-stand procedure.

ACCUVAC Pro Portable Suction Unit

The ACCUVAC Pro is the first step in clearing the patient's airways from obstructions so that effective ventilation can be administered. In an emergency situation the patient's survival depends on keeping the airways clear. ACCUVAC Pro ensures free and clear airways by suctioning the mouth and throat, endotracheal or bronchial areas. The pump's high suction capacity and its easy handling assist medical personnel in carrying out this effective and pro.

Standard Clinic Trolley - 5 Drawers

\$1180.00

+gst & freight

These are great for GP practice, Emergency department or bedside supply trolleys for wards or hospital units.

820mm Wide x 520 mm Deep x 920 High

Standard

With mesh

Recyclable (refer to our recycling guidelines for more information)

Fire retardant - failing to burn when tested to Australian standards

Lightweight and easy to manoeuvre - reducing the OH&S risks of curtain maintenance

USL Reyuard Medicurtains

Haines® MediCurtains are designed to replace reusable curtains in hospitals or healthcare facilities requiring patient privacy and screening. Instead of the cumbersome and costly process of washing untreated reusable curtains, Haines® MediCurtains can remain hung for set intervals of up to two years (depending on the infection risk of the area they are hung). This is possible due to antimicrobial chemical-infused fabric, which actively inhibits bacterial growth.

Various widths & drops and many colours and designs to choose from. Two hook types to fit most rails

WELCH ALLYN THERMOSCAN BRAUN PRO 6000

Advanced measurement technology that captures accurate, reliable temperature readings in a comfortable way for patients

When the PRO 6000 probe tip is placed in the ear, it continuously monitors the infrared energy emitted by the tympanic membrane and surrounding tissues, until a temperature equilibrium has been reached and an accurate measurement can be taken.

Innovative PerfectTemp® technology adjusts for variability in probe placement. ExacTemp® technology detects stability of the probe during measurement.

- A pre-warmed sensor helps support accurate measurements
- Memory recall button displays last measurement taken
- 60-second pulse timer can assist you with manual measurement of pulse rate and respirations .
- Our design uses plastics compatible with common medical-grade cleaning products .

CODE **406000200**

CONTACT US FOR MORE INFORMATION AS THERE ARE MULTIPLE CONFIGURATIONS AVAILABLE

CSM

Designed for simplicity and ease-of-use, delivering accurate, automated vitals in one user-friendly solution capturing a full set of patient vitals in less than a minute.

- Blood Pressure SureBP® technology measures blood pressure on inflation in as little as 15 seconds. Plus, automated blood pressure averaging has been shown to help reduce hypertension misdiagnoses.¹
- Thermometry SureTemp® Plus and Braun thermometry options are known for accurate readings across patient populations.
- Pulse Oximetry Devices support a variety of leading SpO2 technologies: Masimo®, Nellcor® or Nonin®.

PROBP 2000

Our SureBP inflation-based algorithm is used across Welch Allyn vital signs devices, helping clinicians in every care setting capture automated, fast and accurate blood pressure readings.

- Blood pressure readings are captured more comfortably on inflation and take about 20 seconds
- Meets AAMI standards for blood pressure accuracy
- One-button touch triggers the device to start capturing on cuff inflation
- 97% completion rate in the presence of motion

40PRO2000 / ProBP 2000, runs on AA batteries

40107041 / Mains Power Cable

40107194 / Wall Mount

40107195 / Stand

ProBP 3400 with SureBP

Automatic BP unit with fast BP technology.

Does not get tight on the arm

- SureBP™ NIBP technology enables fast, accurate 15-second readings
- Compatible with Welch Allyn cuff sizes from small child to thigh
- Lithium ion battery technology delivers up to 100 readings on a single charge
- Configurable to match your workflow and specific resident needs
- Meets AAMI Standards, awarded BHS A/A rating.
- Obtains accurate readings, even in the presence of some motion or weak pulse

4034XFHT-6 / ProBP 3400 with SureBP

40460061 / ProBP Mobile Stand + Kit

40460161 / ProBP Wall mount - only

40460261 / ProBP Desk mount

WELCH ALLYN® SPOT VITAL SIGNS® 4400 device

ACCURATE READINGS ARE VITAL. Vital signs matter. The first set of patient vital signs can provide a baseline reference for the entire chain of healthcare.

The Spot 4400 is **Simple** - An intuitive, all-in-one design makes the Spot Vital Signs device easy to use—for caregivers at any level.
